Item 7.01 Regulation FD Disclosure.

On October 13, 2016, Alcoa Inc. (“Alcoa”) announced that, in connection with its planned separation into two independent, publicly-traded companies, future companies Arconic Inc. and Alcoa Upstream Corporation (“Alcoa Corporation”) will each host investor events in October 2016. The separation of Alcoa is scheduled to become effective before the opening of the market on November 1, 2016.

As previously disclosed, Alcoa Corporation will commence its series of investor meetings beginning on October 20, 2016, and it will host a global investor webcast on October 20, 2016, at 9 a.m. EDT.

A copy of the Alcoa Corporation materials to be presented at the Alcoa Corporation meetings is attached hereto as Exhibit 99.1, and is incorporated herein by reference. The presentation materials will be available shortly before the commencement of these meetings on www.alcoa.com.

The information in Item 7.01 of this Current Report on Form 8-K and in Exhibit 99.1 is being furnished, not filed, in accordance with the provisions of General Instruction B.2 of Form 8-K. Accordingly, the information in Item 7.01 of Form 8-K and in Exhibit 99.1 will not be incorporated by reference into any registration statement filed by Alcoa under the Securities Act of 1933 unless specifically identified therein as being incorporated therein by reference.

Item 9.01 Financial Statements and Exhibits.

(d) Exhibits.

The following are furnished as exhibits to this report:

<u>Exhibit No.</u>	<u>Description</u>
99.1	Alcoa Corporation Global Investor Presentation, dated October 19, 2016.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

ALCOA INC.

By: /s/ Peter Hong
Name: Peter Hong
Title: Vice President and Treasurer

Date: October 19, 2016

Alcoa Corporation

Investor Presentation

October 2016

Forward-Looking Statements

This presentation contains statements that relate to future events and expectations and as such constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include those containing such words as "anticipates," "believes," "could," "estimates," "expects," "forecasts," "goal," "intends," "may," "outlook," "plans," "projects," "seeks," "sees," "should," "targets," "will," "would," or other words of similar meaning. All statements by Alcoa and Alcoa Upstream Corporation ("Alcoa Corporation") that reflect expectations, assumptions or projections about the future, other than statements of historical fact, are forward-looking statements, including, without limitation, forecasts concerning global demand growth for aluminum, supply/demand balances; statements, projections or forecasts of future financial results or operating performance; statements about strategies, outlook, business and financial prospects; and statements regarding the prospective separation transaction. Forward-looking statements are not guarantees of future performance and are subject to risks, uncertainties, and changes in circumstances that are difficult to predict. Although Alcoa and Alcoa Corporation believe that the expectations reflected in any forward-looking statements are based on reasonable assumptions, each can give no assurance that these expectations will be attained and it is possible that actual results may differ materially from those indicated by these forward-looking statements due to a variety of risks and uncertainties. Such risks and uncertainties include, but are not limited to: (a) the possibility that various closing conditions for the separation may not be satisfied; (b) the impact of the separation on the businesses of Alcoa or Alcoa Corporation; (c) material adverse changes in aluminum industry conditions, including global supply and demand conditions and fluctuations in London Metal Exchange-based prices and premiums, as applicable, for primary aluminum, alumina, and other products, and fluctuations in indexed-based and spot prices for alumina; (d) deterioration in global economic and financial market conditions generally; (e) unfavorable changes in the markets served by Alcoa and Alcoa Corporation; (f) the impact of changes in foreign currency exchange rates on costs and results; (g) increases in energy costs; (h) changes in discount rates or investment returns on pension assets; (i) the inability to achieve the level of revenue growth, cash generation, cost savings, improvement in profitability and margins, fiscal discipline, or strengthening of competitiveness and operations anticipated from restructuring programs and productivity improvement, cash sustainability, technology advancements, and other initiatives; (j) the inability to realize expected benefits, in each case as planned and by targeted completion dates, from acquisitions, divestitures, facility closures, curtailments, or expansions, or joint ventures; (k) political, economic, and regulatory risks in the countries in which Alcoa and Alcoa Corporation operate or sell products; (l) the outcome of contingencies, including legal proceedings, government or regulatory investigations, and environmental remediation; (m) the impact of cyber attacks and potential information technology or data security breaches; and (n) the other risk factors discussed in Alcoa's Form 10-K for the year ended December 31, 2015, Alcoa Corporation's registration statement on Form 10, and other reports filed by Alcoa and Alcoa Corporation with the U.S. Securities and Exchange Commission (SEC). Alcoa and Alcoa Corporation disclaim any obligation to update publicly any forward-looking statements, whether in response to new information, future events or otherwise, except as required by applicable law. Market projections are subject to the risks discussed above and other risks in the market.

Non-GAAP Financial Measures

This presentation includes unaudited "non-GAAP financial measures" as defined in Regulation G under the Securities Exchange Act of 1934, including Adjusted EBITDA. Alcoa and Alcoa Corporation believe that the presentation of non-GAAP financial measures helps investors by providing additional information with respect to the operating performance of Alcoa Corporation and the ability of Alcoa Corporation to meet its financial obligations. The presentation of non-GAAP financial measures is not intended to be a substitute for, and should not be considered in isolation from, the financial measures reported in accordance with GAAP. See the appendix for a reconciliation of the non-GAAP financial measures included in this presentation to their comparable GAAP financial measures. Alcoa Corporation has not provided a reconciliation to forecasted EBITDA to the most directly comparable GAAP financial measures because Alcoa Corporation is unable to quantify certain amounts that would be required to be included in the GAAP measure without unreasonable efforts and Alcoa Corporation believes that such reconciliations would imply a degree of precision that would be confusing or misleading to investors. In particular, reconciliation of guidance for EBITDA to the most directly comparable GAAP measure would not be available without unreasonable efforts on a forward-looking basis due to the variability and complexity with respect to the components of such measure, such as index pricing. References to historical EBITDA herein means adjusted EBITDA, for which we have provided calculations and reconciliations in the Appendix.

Other Information

The separation of Alcoa Inc. into two standalone companies - Alcoa Corporation and Arconic Inc. - is scheduled to become effective before the opening of the market on November 1, 2016.

1. Does not include Yadkin generation, and reflects reduced generation at Warrick.
2. Does not include Transformation, Corp. Pension/OPEB, and Impact of LIFO and metal price lag.

Closing Remarks

Roy Harvey

Global network of world-class aluminum assets and operations

- Bauxite and Alumina: Combination of global industry-leading low-cost assets
- Aluminum: Well-positioned portfolio includes Saudi Arabia Joint Venture, the world's lowest cost aluminum smelter
- Current asset base has been aggressively honed to improve cost position

Strong customer relationships and robust growth opportunities

- Bauxite: Projected 8% growth in global 3rd-party bauxite demand
- Alumina: Increasing demand from China, India, and the Middle East
- Strong aluminum end market demand is expected to fuel growth in Aluminum, Cast Products and Rolled Products segments

Highly experienced senior management with operator-centric culture

- Values: Act with Integrity, Operate with Excellence, Care for People
- Senior leadership team with significant experience and operating expertise
- Culture of innovation and process improvement

Focused on optimizing cost and return on capital (ROC), creating shareholder value

- Relentless focus on cost control and driving out costs from our processes
- Rigorous process for ROC-driven prioritization for capital allocation, and focused on investing in projects that drive shareholder value
- U.S. based public equity in the aluminum sector with leading governance practices

Strong balance sheet and financial position, positioned for the future

- Net Debt of 0.8X LTM EBITDA, Debt-to-Equity of 0.2X
- Approximately \$2B of "hidden" value drivers on the balance sheet
- Strategy focused on generating and managing cash

Pro forma		\$187	\$73

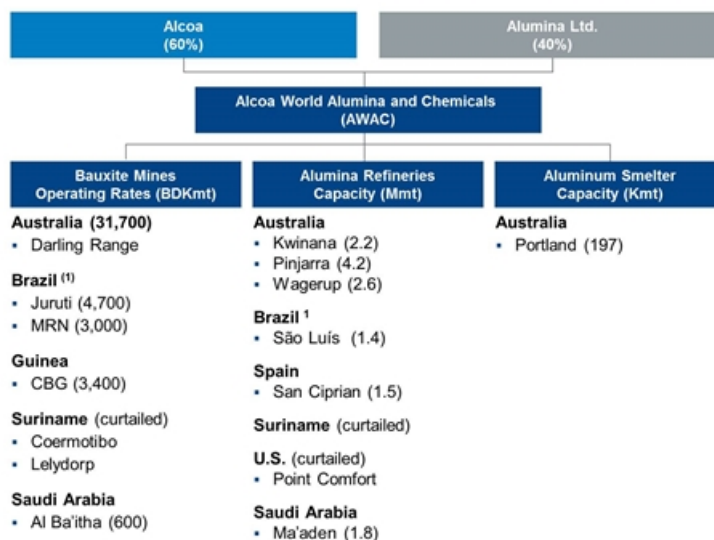

1. For additional information, see Alcoa Upstream Corporation Form 10 as filed with the Securities and Exchange Commission on October 11, 2016.

2. OPEB: Other Postretirement Employee Benefits

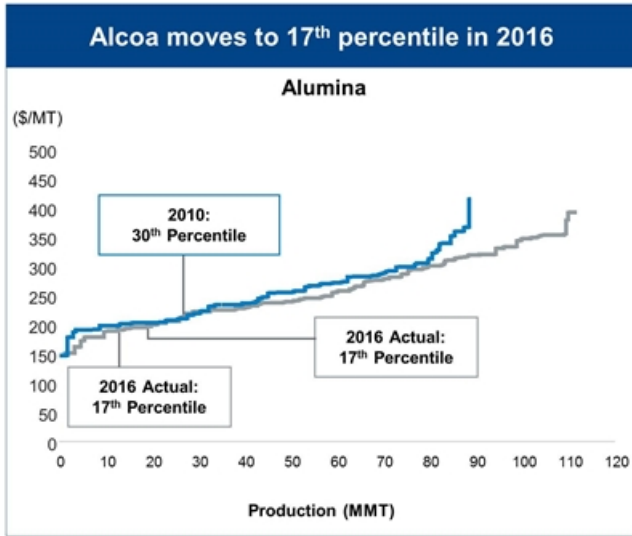

3. Post separation, these plans will be included in the respective direct plans.

AWAC Facts

- Alcoa is the operator of the joint venture
- A Strategic Council consisting of representatives from Alcoa Inc. and Alumina Limited oversees the venture
- Alcoa internally consumes ~30% of the JV's alumina and is responsible for marketing 100% of the products produced

1. Alcoa controls ~0.9 Mmt refining capacity through wholly-owned Brazilian Subsidiaries outside of the JV (Poços de Caldas (0.4 Mmt) and São Luís (0.5 Mmt)), and mining capacity with an operating rate of 0.3 BDkmt at Poços de Caldas.

Price⁽²⁾ remains above January lows (\$/t)

Geographically dispersed mines with a premier low-cost first quartile cost position

1. CRU analysis

2. Includes both equity interests as well as AWAC wholly-owned subsidiaries.

3. Competitor production information sourced from Wood Mackenzie

Alcoa is the largest bauxite miner in the world

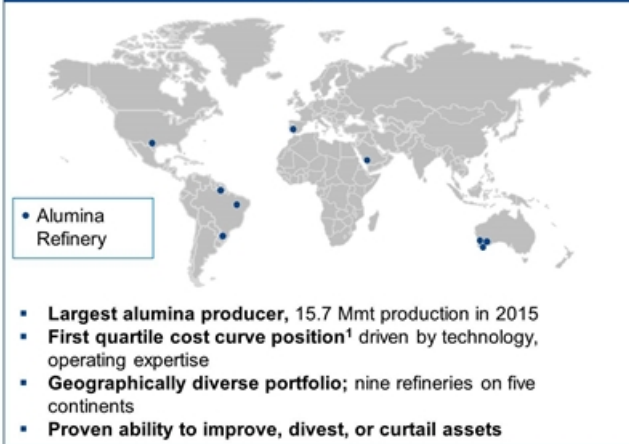

2015 Bauxite production from top 5 producers ^{2,3}
(Mmt)

Building out 3rd party bauxite business; secured multiple bauxite supply contracts

- **\$53M of new contracts in 3Q 2016**; total 3rd party contracts valued at \$468M in expected sales (2016 – 17)

Highly competitive first quartile cost curve position

1. CRU and Alcoa analysis.
 2. Includes both equity interests as well as AWAC wholly-owned subsidiaries
 3. Competitor production information sourced from company filings and Wood Mackenzie.
 4. API: Alumina Price Index

Largest global alumina producer

2015 Alumina production from top 5 producers^{2,3}
 (Mmt)

Energy

- **Gas supply agreement** secures supply for Western Australia refineries **through 2032**
- San Ciprian **natural gas solution** driving cost improvement

Sales and marketing

- **Access to growth markets** in Asia, Middle East, and Latin America
- **Third party shipments of 10.8 Mmt in 2015** (~70% of production)
- **~85% of third party smelter-grade shipments on API⁴/spot in 2016**; up from 5% in 2010

Proven ability to consistently deliver productivity gains in aluminum production...

...complemented by success factors ensuring long-term competitiveness

Sustainable energy

- **~70% of smelter power is hydroelectric**
- **~75% of smelter power secured through 2022**
- **14% of worldwide smelter power was self-generated** in 2015; remainder purchased through **long-term agreements**
- Recent **energy agreements** have **increased competitiveness** of Massena West and Intalco

Active portfolio management

- **Aggressive actions** taken in 2015 and 2016 to divest, close or curtail assets:
 - São Luís smelter curtailment (74,000 mtpy)
 - Poços de Caldas smelter closure (96,000 mtpy)
 - Wenatchee smelter curtailment (143,000 mtpy)
 - Warrick smelter closure (269,000 mtpy)

1. Other includes Lake Charles (carbon products), Gum Springs (spent pot lining treatment facility), and Strathcona (carbon products)

Unique global network of casthouses...

1. Includes 3 curtailed operations, Ma'aden casthouse and Warrick.
2. Based on Alcoa analysis.

...continuously shifting to high value-added products serving a broad customer base

Serving growing markets

- ~50% of total revenue from value-added products; 96% of sales made in **North American (NA)** and **European Union (EU)**
- **+13% Aluminum penetration** in NA and EU automotive sector by 2020; **benefits our billet, foundry and slab sales**

Well-positioned in markets to offer key value-added products

- **#1 primary producer of billet in NA; #2 position in EU**
- **#2 position in NA foundry market; #2 position in EU**
- **#2 position in NA slab market; #2 position in EU**

Focus on customers

- **High quality products** from casthouses in **close proximity to customers**
- **Unparalleled technical support and customer service**
- Developing **innovative new product offerings**

Cast Products key markets, uses and value-added products

Transportation = auto and commercial transportation; global market share based on global volume ex China

Two mill system covering North America packaging markets

• Rolling Mill

World-class operations serving can sheet market

- **Warrick Operations:** Food stock, beverage end & tab stock, lithographic sheet, body stock, and bottle stock
- **Ma'aden Rolling Company¹:** Wide body stock, beverage end & tab

Strong North America market and technology position

North America: #1 or #2 Position²

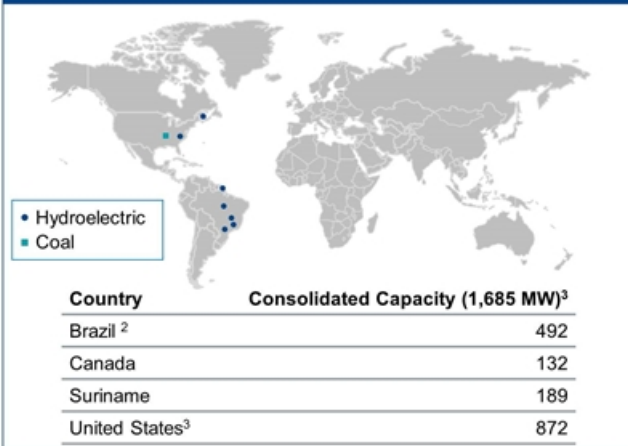

- **#1 Position** (> 90% Share) in **North America aluminium food can** segment
- **#2 Position** in **North America beverage can sheet** segment
- **Only aluminium lithographic sheet maker in North America**
- Will transition Tennessee wide body stock to MRC over three-year period

Ma'aden Rolling Company:

- **State-of-the-art rolling mill**, coating line, and recycling facility for can sheet
- Began operations in 2014

1. JV- Alcoa 25.1% stake in MRC (Ma'aden Rolling Company).
2. Based on AGP (Alcoa Global Packaging) North American 2016 forecast.

Energy assets ¹ in North and South America...

1. Alcoa has an equity interest in the majority of facilities.

2. The Consolidated Capacity of the Brazilian energy facilities is the assured energy that is approximately 55% of hydropower plant nominal capacity

3. Includes the Yadkin Hydroelectric Project (215MW of capacity); sale expected to close in 4Q 2016. Including the Yadkin facility, Alcoa Corporation's current total generation capacity is 1,685MW, of which approximately 61% is hydroelectric power

...managed to create maximum profitability under a variety of situations

Strategic power management

- Brazil assets **provide optionality** between **market sales** and **metal production** with a diversified revenue stream
- Approximately **55% of generated power was sold externally** in 2015, capturing significant earnings
- **Securing energy needs** for operations with third parties

Asset portfolio

- **Sale of Yadkin Hydroelectric Project** in North Carolina expected to close in Q4 2016
- Excluding Yadkin, **~55% of portfolio is hydroelectric**

Source: Alcoa Corporation Form 10

1. This entity is part of the AWAC group of companies and is owned 60% by Alcoa Corporation and 40% by Alumina Limited

2. Alumínio is owned 100% by Alcoa Corporation

3. Brazilian mineral legislation does not establish the duration of mining concessions. The concession remains in force until the exhaustion of the deposit. The company estimates that (i) the concessions at Poços de Caldas will last at least until 2020, (ii) the concessions at Trombetas will last until 2046 and (iii) the concessions at Juruti will last until 2100. Depending, however, on actual and future needs, the rate at which the deposits are exploited and government approval is obtained, the concessions may be extended to (or expire at) a later (or an earlier) date

4. Alcoa World Alumina LLC ("AWA LLC") owns 100% of N.V. Alcoa Minerals of Suriname ("AMS"). Suralco and AMS are parts of the AWAC group of companies which are owned 60% by Alcoa Corporation and 40% by Alumina Limited

5. At the end of 2015, AWAC's bauxite mineral and mining rights remained valid until 2033. The AWAC mines in Suriname were curtailed in the fourth quarter of 2015. There are no plans for AWAC to restart these mines and there are no reserves to declare

6. Alumínio holds an 8.58% total interest, AWA Brasil holds a 4.62% total interest and AWA LLC holds a 5% total interest in MRN. MRN is jointly owned with affiliates of Rio Tinto Alcan Inc., Companhia Brasileira de Alumínio, Companhia Vale do Rio Doce, BHP Billiton Plc ("BHP Billiton") and Norsk Hydro. Alumínio, AWA Brasil, and AWA LLC purchase bauxite from MRN under long-term supply contracts

7. AWA LLC owns a 45% interest in Halco (Mining), Inc. ("Halco"). Halco owns 100% of Boké Investment Company, a Delaware company, which owns 51% of CBG. The Guinean Government owns 49% of CBG, which has the exclusive right through 2038 to develop and mine bauxite in certain areas within an approximately 2939 square-kilometer concession in northwestern Guinea

8. AWA LLC and Alumina Española, S.A. have bauxite purchase contracts with CBG that expire in 2033. Before that expiration date, AWA LLC and Alumina Española, S.A. expect to negotiate extensions of their contracts as CBG will have concession rights until 2038. The CBG concession can be renewed beyond 2038 by agreement of the Government of Guinea and CBG should more time be required to commercialize the remaining economic bauxite within the concession

9. Guinea-Boké: CBG prices bauxite and plans the mine based on the bauxite qualities of total alumina (TAA203) and total silica (TSiO2)

10. Ma'aden Bauxite & Alumina Company is a joint venture owned by Saudi Arabian Mining Company ("Ma'aden") (74.9%) and AWA Saudi Limited (25.1%). AWA Saudi Limited is part of the AWAC group of companies and is owned 60% by Alcoa Corporation and 40% by Alumina Limited

11. Kingdom of Saudi Arabia- Al Ba'itha: Bauxite reserves and mine plans are based on the bauxite qualities of total available alumina (TAA) and total silica (TSiO2)

Geographically distributed refining assets

1. Nameplate Capacity is an estimate based on design capacity and normal operating efficiencies and does not necessarily represent maximum possible production

2. The figures in this column reflect Alcoa Corporation's share of production from these facilities. For facilities wholly- owned by AWAC entities, Alcoa Corporation takes 100% of the production

3. This entity is part of the AWAC group of companies and is owned 60% by Alcoa Corporation and 40% by Alumina Limited

4. This entity is owned 100% by Alcoa Corporation

5. As a result of the decision to fully curtail the Poços de Caldas smelter, management initiated a reduction in alumina production at this refinery. The capacity that is operating at this refinery is producing at an approximately 45% output level

6. The named company or an affiliate holds this interest

7. The capacity that is operating at this refinery is producing at an approximately 95% output level

8. AWA LLC owns 100% of N.V. Alcoa Minerals of Suriname ("AMS"). AWA LLC is part of the AWAC group of companies and is owned 60% by Alcoa Corporation and 40% by Alumina Limited

9. The Suralco alumina refinery has been fully curtailed (see below)

10. The Point Comfort alumina refinery will be fully curtailed (see below)

11. Ma'aden Bauxite & Alumina Company is a joint venture owned by Saudi Arabian Mining Company ("Ma'aden") (74.9%) and AWA Saudi Limited (25.1%). AWA Saudi Limited is part of the AWAC group of companies and is owned 60% by Alcoa Corporation and 40% by Alumina Limited

1. Nameplate Capacity is an estimate based on design capacity and normal operating efficiencies and does not necessarily represent maximum possible production

2. The figures in this column reflect Alcoa Corporation's share of production from these facilities

3. The named company or an affiliate holds this interest

4. This figure includes the minority interest of Alumina Limited in the Portland facility, which is owned by AofA. From this facility, Alcoa Corporation takes 100% of the production allocated to AofA

5. The Portland smelter has approximately 30,000 mtpy of curtailed capacity

6. The Alumar smelter has been fully curtailed since April 2015 (see below)

7. Owned through Rio Tinto Alcan Inc.'s interest in Pechiney Reynolds Québec, Inc., which is owned by Rio Tinto Alcan Inc. and Alcoa Corporation

8. The Avilés and La Coruña smelters have approximately 56,000 mtpy of curtailed capacity combined

9. On March 24, 2016, ParentCo permanently stopped production at the Warrick smelter

10. The Rockdale smelter has been fully curtailed since the end of 2008

11. The Intalco smelter has had approximately 49,000 mtpy of curtailed capacity. In November 2015, ParentCo announced that it would curtail the remaining 230,000 mtpy capacity by the end of the first quarter of 2016. In January 2016, ParentCo announced that it will delay this further curtailment of the smelter until the end of the second quarter of 2016. On May 2, 2016, ParentCo announced that it would not curtail the Intalco smelter at the end of the second quarter as previously announced, as a result of an agreement with the Bonneville Power Administration

12. The Wenatchee smelter has had approximately 41,000 mtpy of curtailed capacity. Alcoa Corporation curtailed the remaining 143,000 mtpy of capacity by the end of December 2015

Bauxite	Negotiated prices
Alumina	API pricing follows 30-day lag; LME pricing follows 60-day lag
Aluminum	15-day lag to LME + Regional Premium – Molten Discount

Segment	Pricing Impacts
Cast Products	30-day lag to LME + Regional Premium + Product Premium
Rolled Products	30-day lag to LME + Regional premium + Product Premium
Energy	Market pricing

Alcoa Corporation adjusted EBITDA reconciliation

(\$ in millions)

	LTM						
	Q2 2016	1H 2016	2H 2015	1H 2015	2015	2014	2013
Sales							
Sales to unrelated parties	\$8,652	\$3,953	\$4,699	\$5,422	\$10,121	\$11,364	\$11,035
Sale to related parties	930	499	431	647	1,078	1,783	1,538
Total sales	\$9,582	\$4,452	\$5,130	\$6,069	\$11,199	\$13,147	\$12,573
Adjusted EBITDA							
Net (Loss) Income attributable to Alcoa Corporation	\$(1,197)	\$(265)	\$(932)	\$69	\$(863)	\$(256)	\$(2,909)
Add:							
Net income (loss) attributable to non-controlling interest	35	38	(3)	127	124	(91)	39
Provision for income taxes	255	86	169	233	402	284	123
Other expenses (income), net	71	16	55	(13)	42	58	14
Interest expense	261	130	131	139	270	309	305
Restructuring and other charges	832	92	740	243	983	863	712
Impairment of goodwill	-	-	-	-	-	-	1,731
Provision for depreciation, depletion, and amortization	731	355	376	404	780	954	1,026
Adjusted EBITDA	\$988	\$452	\$536	\$1,202	\$1,738	\$2,121	\$1,041

Alcoa Corporation's definition of Adjusted EBITDA (Earnings before interest, taxes, depreciation, and amortization) is net margin plus an add-back for depreciation, depletion, and amortization. Net margin is equivalent to Sales minus the following items: Cost of goods sold; Selling, general administrative, and other expenses; Research and development expenses; and Provision for depreciation, depletion, and amortization. Adjusted EBITDA is a non-GAAP financial measure. Management believes that this measure is meaningful to investors because Adjusted EBITDA provides additional information with respect to Alcoa Corporation's operating performance and the Company's ability to meet its financial obligations. Management believes that pro forma Adjusted EBITDA is meaningful to investors because it provides additional information about the expected impact of the separation and distribution on Adjusted EBITDA. The Adjusted EBITDA presented may not be comparable to similarly titled measures of other companies.

Segment adjusted EBITDA reconciliation

(\$ in millions)

Alcoa Corporation - Segments	For the year ended December 31, 2015					
	Bauxite	Alumina	Aluminum	Cast Products	Energy	Rolled Products
After-tax operating income (ATOI)	\$258	\$476	\$1	\$110	\$145	\$20
Add:						
Depreciation, depletion, and amortization	94	202	311	42	61	23
Equity (income) loss	-	41	12	-	-	32
Income taxes	103	191	(77)	49	69	26
Other	-	-	(3)	-	-	-
Adjusted EBITDA	\$455	\$910	\$244	\$201	\$275	\$101
Total sales	\$1,231	\$5,030	\$5,106	\$6,232	\$723	\$1,011
Adjusted EBITDA margin	37.0%	18.1%	4.8%	3.2%	38.0%	10.0%

Alcoa Corporation's definition of Adjusted EBITDA (Earnings before interest, taxes, depreciation, and amortization) is net margin plus an add-back for depreciation, depletion, and amortization. Net margin is equivalent to Sales minus the following items: Cost of goods sold; Selling, general administrative, and other expenses; Research and development expenses; and Provision for depreciation, depletion, and amortization. The Other line in the table above includes gains/losses on asset sales and other non-operating items. Adjusted EBITDA is a non-GAAP financial measure. Management believes that this measure is meaningful to investors because Adjusted EBITDA provides additional information with respect to Alcoa Corporation's operating performance and the Company's ability to meet its financial obligations. The Adjusted EBITDA presented may not be comparable to similarly titled measures of other companies.
